

# RITIK KUMAR

DATA ENGINEER

PORTFOLIO QR

## PROFILE

Aspiring Data Engineer with hands-on experience in SQL, data cleaning, and data modeling. Skilled in building data pipelines using Medallion Architecture (Bronze, Silver, Gold). Passionate about transforming raw data into meaningful insights.

## DATA PROJECT EXPERIENCE

### SQL, Data Warehousing

- Implemented a data warehouse solution using the AdventureWorks dataset.
- Developed ETL workflows and transformation logic for structured analytics.
- Performed data cleaning, schema design, and query optimization for reporting performance.

### SQL, PySpark, Medallion Architecture

- Designed and developed a large-scale data warehouse with 97 tables across Bronze, Silver, and Gold layers.
- Built ETL pipelines for data ingestion, transformation, and data cleaning using SQL and PySpark.
- Implemented dimensional data modeling in Gold layer using fact and dimension tables.
- Applied data quality checks and transformation logic for reliable analytics and reporting.

### PySpark, Data Lake Concepts

- Developing a scalable lakehouse architecture for large-scale data processing.
- Exploring distributed data transformation and storage optimization using PySpark.

### Power BI, Tableau

- Designed and developed interactive dashboards for business insights and KPI tracking.
- Created visualizations to analyze sales, customer behavior, and operational performance.
- Implemented data transformation and modeling for improved reporting accuracy.

## SKILLS

### Core Skills (Must Include):

- SQL / Python
- Data Warehousing
- PySpark / Pandas
- ETL & Data Modeling

### Supporting Skills:

- Databricks / DBT
- Power BI / Tableau
- Data Lake & Lakehouse
- Generative AI

## EDUCATION

Higher Secondary (12th) — Science (PCM)

Bihar School Examination Board (BSEB)

Subjects: PCM | English Medium

Score: 76% | Year: 2024

### Certifications

Completed 25+ certifications in Data Engineering and analytics with hands-on project experience.
